## RICHARD III

## INTRODUCTION

The Wars of the Roses lasted thirtytwo years, from 1455-86. However, it was not a continuous war. Battles tended to be bloody, and neither side could afford to maintain a permanent army of any size. Most military campaigns lasted only a few months, separated by 6-12 years of uneasy peace.

## PLAYERS

The game is intended for two players. One player represents the House of Lancaster (red), the other the House of York (white). During the game, either player may hold the throne and is called the King. The other player is called the Pretender. These roles can change more than once. The game starts with the House of Lancaster as King, and the House of York as Pretender.

## THE CARDS

The game has twenty-five (25) cards, nineteen (19) Action cards and six (6) Event cards. At the beginning of each Campaign, the cards are shuffled, and seven (7) cards are dealt face-down to each player. The remaining cards are not used this campaign.

## CONTENTS

- Game Map
- 63 blocks (31 red, 31 white, 1 black).
- Label sheet (for blocks)
- Cards (25)
- Dice (4)
- Rules

### 1.0 GAME TURNS

The game consists of three (3) Campaigns, each of seven (7) Game Turns, for a total of twenty-one Game Turns. A Political Turn links the campaigns.

Each Game Turn has four (4) Phases, played in the sequence below.

### 1.1 CARD PHASE

Each player starts a Game Turn by playing one (1) card facedown. The cards are then revealed. The player with the higher card is Player 1 that Game Turn. The Pretender is Player 1 on ties.

Event cards have a special action defined on the card. The player of an Event card is always Player 1. If both plays are Event cards, the AP values on the two cards determines Player 1, but if still tied, the Pretender is Player 1.
NOTE: Players must play a card, but can do nothing if desired. Actions cannot be saved for future use.

### 1.2 ACTION PHASE (5.0)

Player 1 plays, then Player 2. Card values ( $\varnothing$-4) equal Action Points (AP). Each Action Point allows:

- 1 Move: any/all blocks in one area may move one or two areas, but must stop if entering an enemy-occupied area. See 5.0.
- 1 Recruit: Choose one block from your pool and deploy at full strength on the map. See 5.4. Blocks cannot move in the same turn they are recruited. Choose them after all movement is complete, or place them face-down until you have completed all movement.
EXAMPLE: Card AP3 allows 3 Moves, or 2 Moves and 1 Recruit, or 1 Move and 2 Recruits, or 3 Recruits.

### 1.3 BATTLE PHASE (6.0)

After both players have completed all movement, battles are fought by opposing blocks in the same area. They are fought one at a time in any sequence determined by Player 1.

### 1.4 SUPPLY PHASE (7.0)

Players simultaneously determine if Supply Limits (7.1) and Exile Limits (7.2) apply. Take losses as necessary.

Repeat phases 1-4 until all seven (7) cards are played.

## Henry of Lancaster Henry VI, 1421-1471

But all his mind is bent to holiness To number Ave Marias on his beads His champions are the prophets and apostles His weapons holy saws of sacred writ.

Henry VI Part II, Act I, Scene III.

## Rulebook Organization

This rulebook is formatted so that the sidebar (this column) contains examples, clarifications, and historical commentary to help you understand and enjoy this game.

## Margaret of Anjou

Henry VI was not a warrior king, but his dynamic queen, Margaret of Anjou, made up for his lack. Ruthless and driven to preserve the throne for her son, she was defeated only with the death of Prince Edward at Tewkesbury in 1471. Margaret is listed on the Henry VI block which would otherwise be rated C2.

## Richard III

It is possible to play this game and never have the Duke of Gloucester become Richard III. History is changed with each game.
Richard, Duke of York died at the Battle of Wakefield in 1460. His eldest son became Edward IV a few months later. If York had survived Wakefield, he would likely have become Richard III in 1461. This often happens in this game.
Gloucester was the youngest of York's four sons. It took the brutal murder of Rutland by Lord Clifford (after Wakefield), the execution of Clarence for treason, and the early death at age 40 of Edward IV to bring him the crown. Even then he had to overcome a little matter of two princes, sons of Edward IV. Gloucester has a very good chance of becoming king in this game, perhaps as Richard IV, but he may also die in battle before gaining the crown.

## RICHARD III

### 2.0 MAPBOARD

The mapboard depicts England and Wales in the 15 th century. The Lancaster player sits at the north edge of the map, the York player at the south edge.

### 2.1 AREAS

The map is divided into areas to govern the movement and location of blocks. Areas are separated by yellow, blue, or red borders (5.21) which restrict movement.

Areas can be Friendly, Enemy, Vacant, or Contested. Changes to area control are effective immediately.
Friendly: area occupied by one or more of your blocks.

Enemy: area occupied by one or more enemy blocks.
Vacant: area containing no blocks.
Contested: area containing blocks of both players, awaiting Battle Resolution.

### 2.2 SHIELDS

The major estates for nobles are indicated by shields. Some areas contain shields for two or more different nobles, and some nobles have shields in two or more different areas

Shields provide a combat benefit of +1 firepower ( $\mathrm{B} 2=\mathrm{B} 3$ ) for their noble(s) when defending (not attacking). The defensive benefit applies for the Defender, even if the noble moves there this Game Turn, or defects during battle.

When two or more heirs defend a shield (or Crown: see 2.3) only the senior heir present at the instant of fire gains the combat benefit.

York has three shields on the map. Any York heir can use any of them as home shields. Lancaster has five shields, but three of them are specific: Exeter (Cornwall), SOMERSET (Dorset), and Richmond (Pembroke). A Lancaster heir can use these shields only if the assigned noble is dead.

### 2.3 CROWNS

Some areas contain a Crown symbol. Each crown provides the same defensive benefits of a shield (2.2) to the current KIng or one royal heir.
IMPORTANT: The senior royal heir in a battle is +2 firepower defending his shield and a crown. Hence, Exeter defends Cornwall at A3, but a more senior heir, if present, would get the crown +1 instead.

### 2.4 CITIES

Seven cities are shown on the map: Bristol, Coventry, London, Newcastle, Norwich, Salisbury, and York - four cities favor Lancaster (red names) and three favor York (white names). Each city has a specific levy block. Levies are +1 firepower (C3=C4) when defending their city.

### 2.5 CATHEDRALS

Two cathedrals exist, Canterbury and York, the centers of the two archdioceses. The associated church block is +1 firepower when defending its cathedral.

### 2.6 WALES

Wales consists of four areas: Pembroke, Caernarvon, Powys, \& Glamorgan. These areas can be freely used by either player. They are not exile areas. The Welsh block is +1 firepower (A2=A3) when defending any of the four areas of Wales.

### 2.7 EXILE

Each player has two exile areas:
Lancaster: France \& Scotland
York: Calais \& Ireland
These areas can never be attacked or entered by the enemy player.

### 2.71 Ireland

Ireland is home for the Irish block. Movement to/from Ireland requires a Sea Move (5.3) through the Irish Sea zone.

### 2.72 Scotland

Scotland is home for the Scots block. Lancaster blocks can enter Scotland by move, retreat, or regroup.

### 2.8 SEAS

### 2.81 Sea Zones

There are three Sea Zones: North Sea, English Channel, and Irish Sea. Kent separates the North Sea from the English Channel. Cornwall separates the English Channel from the Irish Sea. Scotland separates the North Sea from the Irish Sea.

### 2.82 Islands

The Isle of Wight and Anglesey are unplayable islands. The Isle of Man contains one of two shields for Lord Stanley. Movement to/from this island requires a Sea Move (5.3).

### 2.83 Ports

All coastal areas contain minor ports, but several contain a ship symbol that designates a major port. Ports improve Sea Movement (5.3).

## Richard Plantagenet <br> Duke of York, 1411-1460

And, by my soul, this pale and angry rose As cognizance of my blood-drinking hate Will I forever, and my faction wear Until it wither with me to my grave Or flourish to the height of my decree.

Henry VI Part I, Act II, Scene IV.

## Shields

Most noble shields depict heraldic arms, sometimes in the simplified form found on banners and worn by retainers. A major exception is the House of York who are all shown bearing the famous Sun in Spendor badge of Edward IV. Their actual arms are too similar to those of the House of Lancaster. We have also given historical badges to three Nevilles (Kent, Salisbury, Warwick) and to the Earls of Pembroke and Devon.

## Royal Shields

Three of the five Lancaster royal shields are home to specific heirs. For example, Dorset is the home shield for Somerset, but becomes available to any Lancastrian heir should Somerset be killed.

## Battle Sites

The main battles of the war are shown on the map, red for Lancastrian victories and white for Yorkist victories.

## Castles \& Towns

The small orange circles are significant castles and towns. They are included only for historical interest.

## Cathedrals

The church had huge landholdings and bishops often had the right to raise troops. Loyalty was an issue since many bishops were younger sons of powerful nobles. For example, a Bourchier was Archbishop of Canterbury, and a Neville became Archbishop of York.

## Exile Areas

Movement to/from Exile requires a Sea Move except for Scotland. None of them can be attacked

### 3.0 ARMIES

One label must be attached to the face of each block. Lightly position each label, ensure it is straight, and then press firmly to the block.

White: House of York (31)
Red: House of Lancaster (31)
Black: Rebel (1)

### 3.1 BLOCK DATA

### 3.11 Strength

The current strength of a block is the number of diamonds on the top edge when the block stands upright. Blocks can have a maximum strength of 4,3 , or 2 .

Strength determines how many sixsided dice (d6) are thrown for a block in combat. A block at strength 4 rolls 4d6 (four six-sided dice); a block at strength 1 rolls 1 d 6.

For each hit taken in combat, the block's strength is reduced by rotating the block 90 degrees counter-clockwise. The sidebar shows the same noble block (Salisbury) at strength 3,2 , and 1.

### 3.12 Combat Rating

The Combat Rating is indicated by a letter and number, such as A2 or B3. The letter (initiative) determines when a block has a battle turn. All $\mathbf{A}$ blocks go first, then all B blocks, then all $\mathbf{C}$ blocks. The number (firepower) indicates the maximum roll that will score a hit. See 6.4.

### 3.13 Loyalty

Some blocks have a Loyalty Rating, noted on the top left of the block. Blocks with a crown in that location are heirs. Blocks with a red or white rose are loyalists who never defect. Blocks with Loyalty Ratings of 1 , 2 , or 3 may defect with a successful Treachery Roll (6.9).
IMPORTANT: Some blocks have different Loyalty Ratings for the two sides. For example, Rivers has Loyalty 1 as a Lancastrian, but Loyalty 2 as a Yorkist.
NEVILLES: This powerful family is represented by three (3) blocks: Warwick, Salisbury, and Kent. They have a special family Loyalty Rating. See: 6.91.

### 3.14 Name \& Title

In most cases the family name is given vertically to the left of the shield. If there is no family name then it is the same as the title (such as Stanley).

### 3.2 BLOCK TYPES

### 3.21 Heirs

Both sides have five (5) heirs to the throne, each with a crown symbol. Heirs are ranked from 1 (senior) to 5 (junior) on the lower right. The current senior heir of each player is the King or Pretender as applicable. Heirs of the King are called royal heirs. An heir has +1 firepower ( $\mathrm{A} 3=\mathrm{A} 4$ ) defending his shield. A royal heir is also +1 defending a crown.

### 3.22 Nobles

Nobles are identified by shields. The blocks represent the noble and his armed retinue. Nobles bearing a red rose (top left) are always loyal to the House of Lancaster; those bearing a white rose are always loyal to the House of York.

Non-rose nobles can support either side. There are two versions of these blocks, red when loyal to the House of Lancaster, and white when loyal to the House of York. Only one of these blocks can be in play at the same time. Nobles have +1 firepower (B2=B3) when defending their shield(s).

### 3.23 Church

Two blocks, Canterbury and York, represent the power and influence of the church. Each counts as one noble for Usurpation. These blocks have +1 firepower ( $\mathrm{C} 2=\mathrm{C} 3$ ) when defending their cathedral.

### 3.24 Levies

Both players have one levy block for each city of their color, plus a Bombard. Levies start in each player's pool and are deployed on the map as noted in 5.4. Levies have +1 firepower ( $\mathrm{C} 2=\mathrm{C} 3$ ) when defending their city.

### 3.25 Mercenaries

Both players have three (3) Mercenaries:
Lancaster: French, Scots, Welsh.
York: Burgundian, Calais, and Irish.

### 3.26 Rebel

Black block that fights for the Pretender.

## Edward Plantagenet Earl of March, Edward IV, 1442-83

Dazzle mine eyes, or do I see three suns Tis wondrous strange, the like yet never heard I think it cites us, brother, to the field That we the sons of brave Plantagenet Each one already blazing by our meeds Should join our lights together And overshine the earth.

> Henry VI Part 3, Act II, Scene I.

## Label Sheet

The upper labels on the die-cut sheet are for YORK (white blocks) and lower labels for LANCASTER (red blocks). The Rebel label in the middle row, separates the two sides and goes on the black block.

## Fog-of-War

Surprise is an exciting aspect of this game. Except when fighting a battle, active blocks stand upright facing the owner. This promotes bluff and innovative strategies because players are uncertain of the strength or identity of an enemy block.

## STEP REDUCTION

Strength 3 Strength 2 Strength 1

### 4.0 SETUP

The game is divided into three (3) Campaigns of seven (7) Game Turns. Each campaign is linked by a Political Turn (8.0). Choose sides, Lancaster or York.

### 4.1 DEPLOYMENT

Both players deploy blocks in the areas noted. Blocks are deployed upright at full strength.

### 4.2 POOL

Each player maintains a pool off-map that contains blocks to be recruited. These blocks stand upright, unseen by your opponent. Recruits are chosen from your pool and deployed on the mapboard as indicated in 5.4.

### 4.3 HOUSE OF LANCASTER (1460)

Henry VI (King): Middlesex
Duke of Somerset: Dorset
Duke of Exeter: Cornwall
Earl of Devon: Cornwall
Earl of Pembroke: Pembroke (Wales)
Earl of Wiltshire: Wilts
Earl of Oxford: Essex
Viscount Beaumont: Lincoln
Lord Clifford: North Yorks
French Mercenary: France
Scots Mercenary: Scotland
Duke of Buckingham: Pool
Earl of Northumberland: Pool
Earl of Shrewsbury: Pool
Earl of Westmoreland: Pool
Lord Rivers: Pool
Lord Stanley: Pool
Bristol (levy): Pool
Coventry (levy): Pool
Newcastle (levy): Pool
York (levy): Pool
York (church): Pool
Bombard: Pool
Welsh Mercenary: Pool
Prince Edward: Minor
Earl of Richmond: Minor
Canterbury (church): Enemy Noble
Duke of Clarence: Enemy Noble
Earl of Warwick: Enemy Noble
Earl of Salisbury: Enemy Noble
Earl of Kent: Enemy Noble

### 4.4 HOUSE OF YORK (1460)

Duke of York (Pretender): Ireland Earl of Rutland: Ireland
Irish Mercenary: Ireland
Earl of March: Calais
Earl of Warwick: Calais
Earl of Salisbury: Calais
Earl of Kent: Calais Calais Mercenary: Calais
Burgundian Mercenary: Calais
Duke of Norfolk: Pool
Duke of Suffolk: Pool
Earl of Arundel: Pool
Earl of Essex: Pool
Earl of Worcester: Pool
Lord Hastings: Pool
Lord Herbert: Pool
Canterbury (church): Pool
London (levy): Pool
Norwich (levy): Pool
Salisbury (levy): Pool
Bombard: Pool
Rebel: Pool
Duke of Clarence: Minor
Duke of Gloucester: Minor
Duke of Exeter: Enemy Noble
Duke of Buckingham: Enemy Noble Earl of Northumberland: Enemy Noble Earl of Westmoreland: Enemy Noble Earl of Shrewsbury: Enemy Noble
Lord Rivers: Enemy Noble
Lord Stanley: Enemy Noble
York (church): Enemy Noble

### 4.5 MINOR HEIRS

Both players start the game with three (3) heirs in play. Absent are Clarence and Gloucester for York, and Prince Edward and Richmond for Lancaster. These heirs are minors when the game starts.

When an heir is killed, the most senior minor heir enters play (see 6.82) at the beginning of the next Supply Phase. Note that Prince Edward is Lancastrian heir \#2.

### 4.6 ENEMY NOBLES

Blocks listed as Enemy Noble have two versions, one York and one Lancaster. The enemy version starts the game as an enemy block, but can change sides with Treachery Rolls (6.9). Keep your version off-map along the east edge of the map until a defection occurs.

## Henry Holland <br> Duke of Exeter, 1430-75

Oh piteous spectacle! Ob bloody times!
Whilst lions war, and battle for their dens
Poor harmless lambs abide their enmity.
Henry VI Part 3, Act II, Scene V

## SCENARIOS

Players have the option to start the game with Campaign 2 or Campaign 3 for historical interest or just to play a shorter game. Scenarios can be found for these on our website: www.columbiagames.com.
Optionally, email info@columbiagames.com and we will return a PDF of these scenarios.

## EVENT CARDS

Surprise: Move one group. Border Limit is +1 to cross all borders. May be used for normal Sea Movment.

Force March: Move one group. Blocks can move up to 3 areas and may attack. Sea Movement not allowed. Border Limits apply.
Muster: Designate one friendly or vacant area. Any/all friendly blocks can move normally to reach the muster area. Sea Movement not allowed.
Piracy: APs must be used for Sea Moves. Attacking is allowed, but no port-to-port bonus. Attacking blocks can only Retreat/Regroup to a friendly/vacant coastal area in the same sea zone. Retreat/Regroup limits are the same as Sea Move limits.
Treason: Move one group. One Treachery roll can be made in any battle (started by you or the enemy player) before it begins. The King, Pretender, or Warwick need not be present.
Plague: Choose one enemy city area. All blocks there lose one step, even if eliminated.

## RICHARD III

### 5.0 ACTIONS

### 5.1 CARDS

Movement is controlled by the available Action Points (AP) on the card played. There are 25 cards in the game, $6 x A P 2$, 7xAP3, 6xAP4, and 6 Event cards.

Event cards have a special action defined on the card. Both the AP value and event are played, but the APs must be used only for that event. Event card priority still applies - e.g, event card APØ has higher priority than a normal AP4.

A hand that totals AP13 (or less), including Event Cards, constitutes a mulligan. A player holding a mulligan may show that hand and request a redeal. This can only be done once per campaign. The opponent may choose to keep his own cards or not. Reshuffle all available cards.

### 5.2 LAND MOVES

For one (1) Action Point, a player may activate any/all blocks in one area for land movement. Blocks move one or two areas. Active blocks may move to the same or different areas as desired.

Blocks may pass freely through friendly blocks, but must stop and fight a battle when they enter an enemy or contested area. Blocks only move once per turn, except to Retreat or Regroup.

### 5.21 Border Limits

The maximum number of blocks that can cross any border per Game Turn depends on its color:
Yellow: 4 blocks
Blue: 3 blocks
Red: 2 blocks (must stop).
Border limits apply to each player. Both players can move two blocks across the same red border. Note that blocks must stop after crossing a Red border.
EXAMPLE: Five (5) blocks in MIDDLESEX wish to move to OXFORD. Four (4) can move directly to OXFORD while one (1) must move via LeICESTER or SUSSEX.

### 5.22 Pinning

Blocks entering an enemy-occupied area are Attacking; the enemy blocks are

## Defending.

Attacking blocks (excluding Reserves) prevent an equal number of defending blocks from moving. The Defender chooses which blocks are pinned. The "unpinned" blocks may move normally and even attack, but cannot cross any border used by enemy blocks to enter that battle.

### 5.3 SEA MOVES

Each AP allows one (1) block to move from one coastal area to another friendly or vacant coastal area within the same Sea Zone (2.81). This is a separate AP expenditure from a Land Move.

Blocks must start and end their Sea Move in a coastal area (or exile). They cannot also move by land in the same turn.

Blocks can Sea Move only to friendly or vacant coastal areas, not to enemy or contested areas.

Blocks in Calais can Sea Move to areas on the English Channel or North Sea. Blocks in France can Sea Move to areas on the English Channel or Irish Sea.

Blocks located in Cornwall, Kent, and Scotland may Sea Move to areas on either connecting Sea Zone.

Blocks cannot Sea Move to/from Hereford, Gloucester, or South Yorks. They can Sea Move to Middlesex

Blocks cannot Retreat/Regroup by Sea Move unless using the Piracy card.

The Scots, Welsh, Rebel, and City Levy blocks can never Sea Move.

### 5.31 Ports

A player can Sea Move two blocks for AP1 when moving from one major port (2.83) to another major port. Both blocks must start in the same major port and move to one Major Port.

### 5.4 RECRUITS

Players may spend any/all Action Points (AP) to recruit blocks from their pool. Recruited blocks can NOT move in the turn they are built. Choose and deploy one (1) block per AP. Deploy recruits at full strength. They do not have to be revealed.
Nobles: deploy in a friendly or vacant area containing their shield.
Church: deploy in a friendly or vacant area containing their cathedral.
Levies: deploy in a friendly or vacant area containing their city.
Bombard: deploy in any friendly city area.
Rebel: deploy in any vacant area, but not an exile area.
Mercenaries: Five mercenaries always start in an exile location. They are recruited simply by moving them normally. The Welsh start in the Lancastrian pool and deploy in any friendly or vacant area of Wales.
IMPORTANT: players may NOT add steps to existing blocks during a campaign.

## George Plantagenet <br> Duke of Clarence, 1449-78

When we saw our sunshine made thy spring And that thy summer bred us no increase We set the axe to thy usurping root And know thou, since we bath begun to strike We'll never leave 'til we hath hewn thee down Or bath'd thy growing with our heated bloods.

Henry VI Part 3, Act II, Scene II

## Move Example

For 1AP, a player may move any/all East Anglia blocks to one or more of Essex, Middlesex, Rutland, Leicester, and Lincoln. The river border limits 3 blocks crossing directly to Rutland, although 3 more could get there via Essex.

## Pinning Example

Five (5) blocks defend Chester. Three (3) blocks attack from Derby and one (1) from Warwick. Assuming the Derby blocks are the Main Attack, a total of 3 blocks in Chester are pinned, but 2 are unpinned and may leave except via the Derby or Warwick borders.

## Estuaries

Blocks in Glamorgan seeking to march to Somerset, must first move to Hereford, then to Gloucester, then to Somerset.
Blocks cannot move from Glamorgan to Somerset, East Yorks to Lincoln, or Kent to Essex. They can make these moves only by Sea Move. Blocks cannot Sea Move to South Yorks, Hereford, or Gloucester, but Middlesex (London) is a port.

## Sea Zones

Blocks in Cornwall can Sea Move to any friendly or vacant area on the English Channel or the Irish Sea. Blocks in Kent can Sea Move to any friendly or vacant area on the English Channel or the North Sea. Blocks in Scotland can Sea Move to any friendly or vacant area on the North or Irish seas.

## Sea Moves Example

AP2 could allow 4 blocks to Sea Move from Calais to Sandwich, or to any other port in the English Channel or North Sea zones. Two blocks could also go to one port and two blocks to another port. Two blocks could also go to one port, and one block to a non-port area.

## RICHARD III

### 6.0 BATTLES

### 6.1 BATTLE SEQUENCE

Battles are fought one by one after all moves are completed. Player 1 determines which battle to fight first. Reveal blocks in that battle by tipping them forward to maintain current strength. After the battle is completed, stand all blocks upright, then Player 1 selects the next battle.

### 6.2 BATTLE TURNS

Each block has one Battle Turn per Battle Round. In its turn, a block may either Fire, Retreat, or Pass, except Retreat is not allowed in Round 1. The sequence of turns depends on combat ratings. "A" blocks go before "B" blocks, then "C" blocks. Defending "A" blocks go before Attacking " A " blocks, and so on.
EXCEPTION: Bombards are A3 for round 1, but D3 in later rounds. They never get A3 if they enter a battle as Reserves.

After all blocks have taken one Battle Turn, one Battle Round has been fought. Battles are fought for a maximum of four (4) battle rounds. Attacking blocks must retreat during Round 4 in their normal battle turn.

### 6.3 BATTLE RESERVES

A player may attack via one, two or three different borders, up to the limits of each border. Attacking via four different borders is prohibited. Blocks crossing the various borders need not start their turn in the same area.

One border (attacker choice) must be declared the Main Attack. Blocks using other borders are placed in Reserve.
EXAMPLE 1: York has 2 blocks in Wilts and 4 in Kent. Both groups attack SUSSEX. The Attacker declares the KENT group his Main Attack.
EXAMPLE 2: LANCASTER has 1 block in each of Middlesex, Oxford, and Gloucester. Expending AP3, these blocks combine for a Main Attack against 2 York blocks in Sussex via the Oxford/Sussex river border.

Reserve blocks may not fire, retreat, or take hits in Round 1. They arrive at the start of Round 2 to take normal turns.
EXCEPTION: If all Round 1 blocks are eliminated, Reserve blocks for that side immediately deploy. They cannot fire until Round 2, but take hits normally from unfired enemy blocks during Round 1.
CONTROL changes if all defending blocks are eliminated in Round 1. The Defender is
now the Attacker for further combat, and must retreat in Round 4 if necessary.

Blocks moved by Player 2 to reinforce a battle started by Player 1 are Reserves. A maximum of two different borders are allowed and reserves arrive to fight starting in Round 2.
EXAMPLE: York player attacks Essex from Rutland with 3 blocks (main attack) and from Middlesex with 2 blocks. Lancastrian player has 2 blocks defending Essex, but moves 3 blocks from East Anglia to Essex. Round 1 has 3 Rutland blocks attacking 2 defending Essex blocks. The Middlesex and East Anglia blocks are Reserves that arrive for Round 2.

### 6.4 BATTLE HITS

Each block in its Battle Turn rolls as many dice as its current Strength. A hit is scored for each die roll equal to or lower than the block's Combat Rating.
EXAMPLE: Stanley 3 rolls 3 dice. He has B2 combat: all rolls of $1 \& 2$ are hits, otherwise misses.

All hits by one block are applied immediately to the enemy block with the highest current Strength. If a block is eliminated, surplus hits apply to the next highest Strength enemy block, etc. If two or more blocks have the highest Strength, the owner chooses which to reduce.

Blocks defending their shields, crowns, cathedrals, and cities have a defensive benefit of +1 firepower. See: 2.2/2.3.

### 6.5 HEIR CHARGES

The senior heir present in each battle at the instant of fire has the option to Charge. The charging heir fires at a named enemy block at normal firepower. Surplus hits are forfeit. If the target survives the charge, it gets one bonus fire (normal firepower) at the charging block immediately.

### 6.6 RETREATS

Each block may retreat (instead of attacking) on its Battle Turn, except blocks can never retreat on Battle Round 1.

- Blocks must retreat to adjacent friendly or vacant areas. They may retreat to multiple adjacent areas via different borders.
- Blocks may not retreat via borders that were used by the enemy player to enter the battle. When both players have crossed the same border, only Player 2 may retreat via this border.

> Richard Plantagenet Duke of Gloucester Richard III, 1452-1485
> Conscience is but a word that cowards use Devis'd at first to keep the strong in awe Our strong arms be our conscience, swords our law March on, join bravely, let us to the pell-mell If not to heaven, then hand in hand to hell.

Richard III, Act V, Scene III

## Recruiting

Some areas contain two or three deployment symbols. For example, Northumberland contains a shield (Northumberland) and a City (Newcastle). The Lancastrian could expend 2AP and recruit the noble Northumberland and the Newcastle levy in the same turn. Similarly, East Anglia contains two shields and one city. Here the York player could spend 3AP and raise three blocks from his pool - the nobles Norfolk and Suffolk, plus the Norwich levy.

## Battle Example

Herbert (A2) and Clarence (B2) attack Rivers
(B2). The Battle Turn sequence for each round is: Herbert (A2), Rivers (B2), and Clarence (B2).

## Battle Hits

Unlike most block games, all hits from one firing block are applied to the highest strength enemy block. Only if that block is eliminated do surplus hits carry over to the next strongest block. This can result in one key enemy block being eliminated by one devastating fire, not unlike what happened to the Duke of York, Warwick, and Richard III.

## Attacker/Defender

Because both players move before combat, a player can be the Defender in some battles, and the Attacker in others.

## Pursuit

Many casualties occured from pursuit. This is naturally handled by the game system. A block wishing to retreat must await its normal battle turn. If the Defender survives three battle rounds, the Attacker must retreat during round 4, but takes fire from Defender blocks that have an earlier battle turn.

## RICHARD III

- Border limits apply to retreating blocks each Battle Round.
- Blocks that cannot retreat when required are eliminated.

### 6.7 REGROUPS

When a battle ends the victor (Attacker or Defender) may Regroup. All victorious blocks (including any in Reserve) may move to any adjacent friendly or vacant areas, never to enemy or contested areas. Border Limits (5.21) apply.

### 6.8 ELIMINATED BLOCKS

### 6.81 The King is Dead

The King is dead; long live the King! The senior royal heir becomes King at his current location (even exile) and strength at the beginning of the next Supply
Phase. The location of the new KING must be announced. If the senior royal heir is a minor, see 6.82 .

### 6.82 Death of an Heir

Heirs are permanently eliminated when killed. The enemy player keeps them offmap as a record of the game.

When an heir is killed, the senior minor enters play at the beginning of the next Supply Phase.

Royal heirs enter in any friendly or vacant Crown area. Pretender heirs enter in either Exile area.

### 6.83 Death of a Noble

Rose nobles are permanently eliminated. Other nobles (and church) go to the owner pool face-down. They cannot be recruited again this campaign.
EXCEPTION: The Neville blocks Kent, Salisbury, and Warwick, are permanently killed.

### 6.84 Death of a Levy

Eliminated City levies and Bombards go to the owner pool face-down. They cannot be recruited again this campaign.

### 6.85 Death of a Mercenary

Eliminated mercenaries go to their home area face-down, except the Welsh go face-down to the Lancastrian pool. Mercenaries cannot be recruited again this campaign.

### 6.86 Death of a Rebel

The Rebel if eliminated goes to the Pretender pool face-down. It cannot be recruited again this campaign.

### 6.9 TREACHERY ROLLS

Some nobles were unreliable on the battlefield and several upset victories resulted from treachery.

The King, Warwick, and Pretender may each attempt one (1) Treachery Roll per battle (if present). A Treachery Roll is made in a normal Battle Turn instead of firing or retreating. Choose an enemy block (not in Reserve) and roll as many dice as the target's Loyalty Rating. If all numbers (not the total) rolled are EVEN the block defects to your Reserve at current strength and fights normally starting next round.
EXAMPLE: Treachery Roll is made by the KIng to convert Northumberland, loyalty
2. Two dice are rolled. If both numbers are even, Northumberland defects.

The same block can receive three Treachery Rolls in one battle, such as one each from the Traitor card, the Pretender, and Warwick. A Treachery Roll cannot be made to regain a defected block in the same battle.

### 6.91 Warwick

Kent and Salisbury have a small "Warwick" shield instead of a Loyalty Rating. These blocks have a Loyalty Rating of 2 , but only 1 if Warwick is making the Treachery Roll.
WARWICK cannot make a treachery roll on Northumberland or Westmoreland.

### 7.0 SUPPLY PHASE

### 7.1 SUPPLY LIMITS

Each area can supply up to four (4) blocks without penalty. When more than four blocks exist in one area in the Supply PHASE, each surplus block (owner choice) is reduced one step. Blocks eliminated by supply limit are treated as per 6.8.
CITIES: The Supply Limit in areas containing a city is five (5) blocks.

### 7.2 EXILE LIMITS

Calais and France can each supply up to four (4) blocks, plus local mercenaries. Ireland and Scotland can supply two (2) blocks plus the local mercenary. Extra blocks (owner choice) are subject to normal Supply Penalty. Extra blocks (owner choice) are also sent to the player pool during Campaign Reset (8.5). Hence, with three York blocks in Ireland, but the Irish block is absent, one exile is subject to one step loss each Supply Phase. If still overstacked, one exile (owner choice) goes to the pool on reset.

## Henry Tudor

Henry VII, 1457-1509
This pretty lad will prove our country's bliss His looks are full of peaceful magesty His head by nature fram'd to wear a crown His hand to wield a sceptre; and himself Likely in time to bless a regal throne. Henry VI Part 3, Act IV, Scene VI.

## Example Game Turn

-Deploy forces as per 4.4 and 4.5 .

## Game Turn 1

-Card Play: York 3, Lancaster 3. Cards are tied, but Pretender (York) is Player 1 on ties.
-York (Player 1): Sea Move Warwick \& Salisbury from Calais to East Anglia (port to port so both sea moves cost 1 AP). Recruit Norfolk noble and Norwich Levy in East Anglia to complete 3 actions.
-Lancaster (Player 2): Move OXFORD block to Middlesex. Move Beaumont block to Middlesex. Bombard is recruited and deployed in Middlesex.
-Supply Phase: No battles were created. Neither player has supply problems. Both players now play one new card and another Game Turn is played.

## Battle Treachery

Several battles were decided by treachery. The Battle of Northumberland ended with a Yorkist victory after Lord Gray, defending the Lancastrian left, switched to support York.
Most famous of all was the Battle of Bosworth Field where Stanley defected to the Lancastrian side before the battle, and Northumberland, declined to fight on a pretext that took one third of Richard III's army out of the fight.

## Defecting Nobles

Unlike Hammer of the Scots, nobles in this game can only change sides from a Battle Treachery roll. They do not automatically switch sides if killed. Instead, heirs, roses, and Nevilles are permanently dead, and the others return to the owner's pool.

## RICHARD III

### 8.0 POLITICAL TURN

A campaign ends when all seven (7) Game Turns have been played.

A Political Turn is now played during which the Pretender can usurp the throne, and armies prepare for the next campaign. Play the political actions in the exact order given.

### 8.1 LEVIES DISBAND

Levies, Bombards, and Welsh return to the owner's pool. Mercenaries return to their home areas. Rebel block disbands.

### 8.2 USURPATION

Usurpation occurs when the Pretender controls a majority of nobles and heirs. Each church block counts as one (1) noble. Occupation of London (Middlesex) also counts as one (1) noble.

Exclude any blocks in exile, Isle of Man, or the pool. Ties are won by the King.

If Usurpation occurs, the Pretender's senior heir becomes King. The former King is deposed and must go to exile as the Pretender.

### 8.3 PRETENDER GOES HOME

The Pretender and his heirs on map must go to exile. Nobles/church on map go to their own shield/cathedral, but if enemy-occupied, then to the friendly pool.

> NOTE: Warwick cannot return to Calais if Lancastrian. Subject to Exile Limits (7.2), nobles SALISBURY and KENT (if Yorkist) may also go to Calais if their shield(s) are enemy-occupied. These three Nevilles may also go to each other's shields if their owner is dead.

### 8.4 KING GOES HOME

The King and royal heirs on map return to their shield or any crown area. Nobles/Church on map go to their own shield/cathedral, but if enemy-occupied, then to the friendly pool.
IMPORTANT: For both players, blocks currently in exile must remain in exile.

### 8.5 CAMPAIGN RESET

All face-down blocks in the pool stand-up and are available to be recruited in the upcoming campaign. Move the Rebel block to the Pretender pool. All blocks in the pool and on the map are raised to full strength.

Shuffle all 25 cards and deal seven (7) to each player for the next campaign.

### 9.0 VICTORY

Eliminate all five (5) enemy heirs for an instant victory. Otherwise, after the third Campaign, play through Usurpation (8.2) of the Political Turn. Whoever is King wins the game.

### 9.1 CLARENCE \& EXETER

Two heirs, Exeter (Lancaster) and Clarence (York) are subject to Treachery rolls and can defect to the other side. They cannot defect if they are the King or Pretender. If they do defect:
-They are not heirs for their new side, just nobles who count for usurpation.
-They are not heirs (or nobles) for their original side, but regain that status if they defect back to that side.
-They can be executed (eliminated) during any Supply Phase to ensure they never defect back to their original side.
-No minor heir is activated to replace them unless that heir is killed or executed.
-When required to go home as an enemy noble, ExETER goes to Cornwall, and Clarence to any vacant York shield, otherwise to the friendly pool.

## KINGMAKER (1470)

Victory: eliminate all enemy heirs for an instant victory. Otherwise, whoever is king after Usurpation wins the scenario.

## YORK

King Edward IV (March): Middlesex
Duke of Gloucester: South Yorks
Duke of Buckingham: Warwick
Duke of Norfolk: East Anglia
Duke of Suffolk: East Anglia
Earl of Arundel: Sussex
Earl of Essex: Essex
Lord Hastings: Leicester
Earl Rivers: Leicester
Lord Stanley: Lancaster
Mercenary Irish: Ireland
Mercenary Calais: Calais
Mercenary Burgundian: Calais
Earl of Northumberland: Pool
Earl of Westmoreland: Pool
Canterbury (church): Pool
Bombard: Pool
Levy (London): Pool
Levy (Norwich): Pool
Levy (Salisbury): Pool
Earl of Warwick: enemy
Duke of Clarence: enemy
Earl of Shrewsbury: enemy
York (church): enemy
Duke of Exeter: enemy
Unlisted blocks have been permanently eliminated.

## LANCASTER

Henry VI: Middlesex (prisoner)
Prince Edward: France
Duke of Exeter: France
Earl of Warwick: France
Duke of Clarence: France
Earl of Oxford: France
Mercenary French: France
Mercenary Scots: Scotland
Earl of Pembroke: Pool
Earl of Shrewsbury: Pool
York (church): Pool
Mercenary Welsh: Pool
Bombard: Pool
Levy (Bristol): Pool
Levy (Coventry): Pool
Levy (Newcastle): Pool
Levy (York): Pool
Rebel: Pool
Earl of Richmond: (minor)
Duke of Buckingham: enemy
Earl of Northumberland: enemy
Earl Rivers: enemy
Earl of Westmoreland: enemy
Lord Stanley: enemy
Canterbury (church): enemy
Unlisted blocks have been permanently eliminated.

NOTE: Henry VI is a prisoner of Edward IV in the Tower of London, even if no York blocks are located in the Middlesex area. Deploy the block face-up - it cannot move or engage in combat, but does count as a Lancastrian noble for Usurpation. If a Lancastrian block occupies London, Henry VI is rescued, becomes the Pretender, and can then move and fight normally. If the Yorkists win this scenario, and Henry VI is still a prisoner, he is murdered (eliminated).

## The Campaign

The Earl of Warwick defects to the Lancastrian side after a botched 1469 revolt. He flees to France and plots with Margaret of Anjou to recover the throne for Henry VI. Warwick invades and Edward IV is obliged to flee into exile. But with the support of Burgundy, Edward returns to England and Warwick is killed at the Battle of Barnet. A few weeks later, Prince Edward is defeated and killed at Tewkesbury in Gloucester. Henry VI, a prisoner, is murdered, which makes the House of York secure until the untimely death of Edward IV in 1483.

## Henry VI 1421-1422-1471

Son of the great Henry V, Henry VI came to the throne as an infant and England was ruled by a Regency until he came of age in 1437. He proved to be a sickly, weak king, dominated by his wife Margaret of Anjou and prominent nobles like the Duke of Somerset. Court intrigue led to opposition from the powerful Duke of York, who eventually rebelled to seek the throne. Henry was captured after the Battle of Towton in 1461. A prisoner of Edward IV for almost ten years, Henry regained the throne for six months over the winter of 1470/71 after Warwick the Kingmaker rebelled. Lancastrian defeats at Barnet and Tewkesbury ended that rebellion with Warwick and Prince Edward slain in battle, and Henry VI murdered in the Tower of London.

## Edward IV 1442-1461-1483

One of England's best military commanders, Edward never lost a battle and won several with bold and decisive strategy and tactics. He became head of the House of York after his father's death at the Battle of Wakefield in 1460. With the support of the Archbishop of Canterbury and other prominent churchmen, Edward seized the crown and then defeated the Lancastrians at the Battle of Towton in 1461. His 22 year reign was briefly interrupted by a six month return to the throne by Henry VI in 1471 after Warwick the Kingmaker changed sides. Edward was a competent administrator, but his reputation suffered from later hedonistic conduct. He died suddenly at age 41 leaving two young heirs who were probably murdered in the Tower of London.

## RICHARD III

## RICHARD III (1483)

Victory: a player must eliminate the sole enemy heir for an instant victory. Otherwise, whoever is king after Usurpation wins the scenario.

## YORK

King Richard III: Middlesex
Duke of Norfolk: East Anglia
Duke of Suffolk: East Anglia
Earl of Arundel: Sussex
Earl of Essex: Essex
Earl of Northumberland: Northumbria
Lord Stanley: Lancaster
Mercenary Irish: Ireland
Mercenary Calais: Calais
Mercenary Burgundian: Calais
Earl of Westmoreland: Pool
Canterbury (church): Pool
York (church): Pool
Bombard: Pool
Levy (London): Pool
Levy (Norwich): Pool
Levy (Salisbury): Pool
Duke of Buckingham: enemy
Earl of Shrewsbury: enemy
Earl Rivers: enemy

Unlisted blocks have been permanently eliminated.

## LANCASTER

Earl of Richmond: France
Earl of Oxford: France
Earl of Pembroke: France
Mercenary French: France
Mercenary Scots: Scotland
Duke of Buckingham: Glamorgan
Earl Rivers: Leicester

Earl of Shrewsbury: Pool
Mercenary Welsh: Pool
Bombard: Pool
Levy (Bristol): Pool
Levy (Coventry): Pool
Levy (Newcastle): Pool
Levy (York): Pool
Rebel: Pool
Earl of Northumberland: enemy
Earl of Westmoreland: enemy
Lord Stanley: enemy
Canterbury (church): enemy
York (church): enemy

Unlisted blocks have been permanently eliminated.

## The Campaign

Richard Plantagenet, Duke of Gloucester and young brother of Edward IV, was named regent in the king's will.
Richard quickly discovered that the widowed queen (and her Woodville family) sought to retain power by controlling the two heirs. He seizes the heirs and, encouraged by the Duke of Buckingham, takes the throne as Richard III after persuading Parliament to declare the two princes to be bastards.
The Duke of Buckingham now rebels and supports the Lancastrian Duke of Richmond (Henry Tudor) exiled in Brittany. His revolt in Wales fails and the duke is betrayed and quickly executed. Popular support for Richard III plummets when murder of the two heirs is suspected, although never proven.
After an aborted invasion in 1483, Richmond lands in Wales in early August 1485. He gathers modest support from the Welsh, until Lord Stanley (his father-in-law) defects to his side. Richard III gathers an army in Derby to meet the invader. At the Battle of Bosworth Field, the king is betrayed by the Earl of Northumberland and dies charging the enemy position. Richmond wins the crown as Henry VII.

## Richard III 1452-1483-1485

Some scholars argue that Richard III is a victim of Tudor propaganda. He was an effective and loyal military commander for Edward IV, and a hugely popular lord of the north for many years. He was named by the dying king Edward IV as regent. It is difficult to reconcile these historical facts with the evil hunchback depicted by Shakespeare.
The infamous murder of the two princes in the Tower of London probably happened, but was more likely ordered by the Duke of Buckingham, or even by Henry VII.

## Henry VII 1457-1485-1509

Henry was the Welsh born son of Edmund Tudor and Margaret Beaufort. He spent most of his early life in captivity or exile, but got support for the throne as the last surviving Lancastrian after Richard III's unsavory usurpation. He defeated Richard III at the Battle of Bosworth Field in 1485 and founded the House of Tudor. He was succeeded by his son Henry VIII.
